WALKING WITH CAVEMEN MOVIE WORKSHEET

PART 1

1. What's the name of the human ancestor discussed in this section of the movie?

2. How did this species get its name? Does it have a special meaning?

3. How long ago did they live? _____

4. Did any other hominid species live on Earth at the same time as this species?

5. List the key characteristics and adaptations of this hominid (human-like) species.

6. How was this hominid species different than modern humans?

7. Suggest a hypothesis as to why this hominid species became extinct.

PART 2

1. What's the name of the human ancestor discussed in this section of the movie?

2. How did this species get its name? Does it have a special meaning?

3. How long ago did they live? _____

4. Did any other hominid species live on Earth at the same time as this species?

5. List the key characteristics and adaptations of this hominid (human-like) species.

6. How was this hominid species different than modern humans?

7. Suggest a hypothesis as to why this hominid species became extinct.

PART 3

1. What's the name of the human ancestor discussed in this section of the movie?

2. How did this species get its name? Does it have a special meaning?

3. How long ago did they live? _____

4. Did any other hominid species live on Earth at the same time as this species?

5. List the key characteristics and adaptations of this hominid (human-like) species.

6. How was this hominid species different than modern humans?

7. Suggest a hypothesis as to why this hominid species became extinct.

PART 4

1. What's the name of the human ancestor discussed in this section of the movie?

2. How did this species get its name? Does it have a special meaning?

3. How long ago did they live? _____

4. Did any other hominid species live on Earth at the same time as this species?

5. List the key characteristics and adaptations of this hominid (human-like) species.

6. How was this hominid species different than modern humans?

7. Suggest a hypothesis as to why this hominid species became extinct.

PART 5

1. What's the name of the human ancestor discussed in this section of the movie?

2. How did this species get its name? Does it have a special meaning?

3. How long ago did they live? _____

4. Did any other hominid species live on Earth at the same time as this species?

5. List the key characteristics and adaptations of this hominid (human-like) species.

6. How was this hominid species different than modern humans?

7. Suggest a hypothesis as to why this hominid species became extinct.

PART 6

1. What's the name of the human ancestor discussed in this section of the movie?

2. How did this species get its name? Does it have a special meaning?

3. How long ago did they live? _____

4. Did any other hominid species live on Earth at the same time as this species?

5. List the key characteristics and adaptations of this hominid (human-like) species.

6. How was this hominid species different than modern humans?

7. Suggest a hypothesis as to why this hominid species became extinct.

PART 7

1. What's the name of the human ancestor discussed in this section of the movie?

2. How did this species get its name? Does it have a special meaning?

3. How long ago did they live? _____

4. Did any other hominid species live on Earth at the same time as this species?

5. List the key characteristics and adaptations of this hominid (human-like) species.

6. How was this hominid species different than modern humans?

7. Suggest a hypothesis as to why this hominid species became extinct.

PART 8

1. What's the name of the human ancestor discussed in this section of the movie?

2. How did this species get its name? Does it have a special meaning?

3. How long ago did they live? _____

4. Did any other hominid species live on Earth at the same time as this species?

5. List the key characteristics and adaptations of this hominid (human-like) species.

6. How was this hominid species different than modern humans?

7. Suggest a hypothesis as to why this hominid species became extinct.
